

SIMATS ENGINEERING

ASSESSMENT TOOL 1: Experiments

COURSE NAME: Cloud Computing and
Big Data Analytics

COURSE CODE: CSA15

COURSE OUTCOME COVERED

CO3: *Implement cloud-based solutions using cloud storage, web APIs, and platform services for real-world applications. (BL3)*

Assessment Tool Weightage: 40%

Dave's Taxonomy: Precision (Level 3)
Question Count: 5

Total Marks: 40

Code of Conduct

I _____ (Name / Reg No) certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment.

I understand that any violation of academic integrity rules will result in disciplinary action.

Signature of the student: _____

Assessment Tasks

Experiments

1. Experiment 1: Create and document a cloud storage comparison between object, block, and file storage. Select the best storage model for backups, VM disks, and shared enterprise documents.
2. Experiment 2: Develop a simple REST API workflow for a cloud-based student portal. Show request, response, authentication, and deployment flow.
3. Experiment 3: Design a serverless event flow for image upload processing using object storage, function-as-a-service, and notification service.
4. Experiment 4: Compare edge computing and fog computing for a smart traffic management system. Include architecture, latency considerations, and deployment location.
5. Experiment 5: Demonstrate a cloud application deployment workflow showing client access, browser interaction, web API call, storage access, and monitoring.

For each experiment, include objective, architecture sketch, procedure, expected output, and conclusion.

Experiments Rubric

Criteria	Weightage	Level 4 - Exemplary	Level 3 - Proficient	Level 2 - Developing	Level 1 - Beginning
Experimental Design	25%	Design is systematic and technically strong	Mostly correct design	Basic design with gaps	Poorly designed activity
Use of Tools / Platforms	20%	Appropriate and effective use of cloud tools	Good tool usage with minor issues	Limited tool usage	Incorrect or missing tool usage

Application of Concepts	20%	Concepts are applied accurately to practical tasks	Mostly accurate application	Partial application	Weak application
Analysis and Output	20%	Strong analysis and meaningful outcome interpretation	Good analysis with minor gaps	Basic analysis	Little or no analysis
Documentation	15%	Clear, structured, and complete documentation	Mostly complete documentation	Partially complete	Poor documentation
