

EXP NO 6: CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR PRODUCT SELLING USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

DATE:

AIM:

To create a simple cloud software application for product selling using any cloud service provider to demonstrate saas.

PROCEDURE:

step1: Go to zoho.com.

step 2: Log into the zoho.com.

step 3: Select one application step.

step4: Enter application name as product selling.

step 5: Created new application as product selling.

step 6: Select one form

step 7: The software has been created.

IMPLEMENTATION:

DESIGN:

The screenshot displays the Zoho Creator interface for a 'Library Book Reservation' application. The interface is divided into three main sections: a 'Basic Fields' panel on the left, a central form editor, and a 'Field Properties' panel on the right.

Basic Fields Panel: This panel contains various field types that can be added to the form, including Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, and Drop Down.

Central Form Editor: This section shows the form layout with the following fields: Reservation ID (highlighted), Student Name, Reg no, Department, Book Title, Author, Book Category, Reservation Date, Status, and Return Date.

Field Properties Panel: This panel provides configuration options for the selected 'Reservation ID' field. It includes fields for 'Field name' (Reservation ID), 'Field link name' (Reservation_ID), and a 'View Field References' link. Under the 'Validation' section, there are checkboxes for 'Mandatory' and 'No duplicate values'. The 'Initial value' field is set to 'Initial value'. The 'Character maximum' is set to '255'. Under the 'Data Privacy' section, there is a checkbox for 'Contains personal data (PII)'.
